

INCREASE SUPPLY CHAIN FLEXIBILITY AND CONTROL

CONTRACT LOGISTICS SERVICES BY MIQ LOGISTICS

Are conditions in your market and the economy causing you to rethink your approach to supply chain management? Cost efficiencies are essential; so is a nimble supply chain which can respond to changing conditions. The warehouse and distribution management professionals at MIQ Logistics can help you engineer and operate the right solution for your business.

- Select warehouse sites that are effective and efficient, reduce your transportation spend, and increase your service levels.
- Engineer warehouse space for optimum use, avoiding wasted space and expenses.
- Increase visibility for enhanced inventory optimization, increased turns and reduced in-stock levels.
- Respond quickly to customer needs with light assembly, kitting, packing, and other value-added services.
- Transfer lease, facility and personnel management to professionals skilled in lean distribution processes.
- Free up capital with reductions in real estate, material handling equipment, and payroll.
- Access state-of-the-art technology for increased inventory visibility and informed decision making.

With warehouse and distribution expenses responsible for as much as a third of overall logistics costs, let us help you make sure your investments are delivering the appropriate returns and giving you greater control over your supply chain.

CONTRACT LOGISTICS SERVICES

GREATER FLEXIBILITY AND CONTROL WHILE YOU IMPROVE YOUR COSTS

MIQ Logistics offers comprehensive contract logistics services, allowing you to focus on your core competencies by managing your distribution and transportation networks and achieving optimal service and cost goals. Below are service areas which can help support optimal solutions:

Contract Logistics

- Dedicated warehouse space: Includes inventory control, fulfillment and distribution center management services in major trade regions around the world.
- Customized order fulfillment: Consolidates multiple SKUs / line items or individual units into a predetermined configuration.
- Tier 1 WMS: Supports voice pick and pick-to-light.
- Vendor compliance: Leverages our experience with major retailers and mass merchandisers.
- Global scale: Contract logistics services available in more than 80 countries.

Trans-Loading and Fulfillment

- DC bypass: Increases inventory velocity and reduces bricks-and-mortar expenses.
- Vendor consolidation: Bundles purchase orders / shipments from multiple suppliers going to a distribution center(s).
- Better work-order fulfillment: Sorts products that arrive in bulk from vendors and allocates them to specific orders.
- Import deconsolidation: Allows customer to wait until the product reaches port and moves to a global distribution center before determining its ultimate destination.

Value Added Services

- Light assembly: Supports manufacturing operations.
- Kitting, repackaging and conversion activities: Combines one or more items into a new product or SKU.
- Display shipper: Converts repackaged product and display materials (trays, headers and stands) into custom-constructed assemblies which are pallet ready.
- Specialized product identification: Adds necessary information right on a pallet, case, inner or on each level.
- Samples: Packages samples individually into a case or carton variety pack, and then labels for shipment.
- Utilization of transportation services: Adds pickup and delivery options to support customer needs.
- Engineering analysis: Performs continuous productivity studies to eliminate waste and incorporate lean distribution processes.
