

# OVERSIZED SHIPMENTS? REMOTE LOCATIONS?

MINING, ENERGY AND PROJECT LOGISTICS SERVICES FROM MIQ LOGISTICS

Complex processes and urgent needs are what mining and energy companies often face. When it comes to their supply chains, these companies need fast responses, flexible solutions and fail-safe reliability. That's in addition to the efficiencies and control that contribute positively to the bottom-line.

Mining and energy companies rely on MIQ Logistics for all that and more. We also have the proven experience in project logistics to handle heavy, over-dimensional equipment and the complications associated with remote locations.

At MIQ Logistics, dedicated teams, supported by state-of-the-art technologies, deliver:

- Comprehensive transportation, warehouse and yard management, and global services with the convenience of a single, experienced provider.
- Complete project management that simplifies processes while ensuring seamless handling of shipments.
- In-country expertise, available around the world, that facilitates the movement of shipments and customs processing.
- Supply chain visibility for better control every step of the way.

MIQ Logistics will successfully carry out supply chain solutions that meet the biggest challenges of your mining or energy operations.
